

## Warmup Monday February 13, 2017

1. Mrs. Reber's office is a rectangle. The total area is 77 square feet. The length is 7 feet. How wide is Mrs. Reber's office?

2.

A recipe called for using  $6\frac{5}{9}$  cups of flour before baking and another  $5\frac{4}{9}$  cups after baking. What is the total amount of flour needed in the recipe?

3. Wayne bought  $3\frac{1}{3}$  pounds of green grapes and  $2\frac{2}{3}$  pounds of red grapes. How much more did the green grapes weigh than the red grapes?

4.

$$7\frac{5}{8} + 2\frac{7}{8} =$$

✓

# Warmup Monday February 13, 2017

1. Mrs. Reber's office is a rectangle. The total area is 77 square feet. The length is 7 feet. How wide is Mrs. Reber's office?

2.

A recipe called for using  $6\frac{5}{9}$  cups of flour before baking and another  $5\frac{4}{9}$  cups after baking. What is the total amount of flour needed in the recipe?

3. Wayne bought  $3\frac{1}{2}$  pounds of green grapes and  $2\frac{2}{3}$  pounds of red grapes. How much more did the green grapes weigh than the red grapes?

4.

$$7\frac{5}{8} + 2\frac{7}{8} =$$

✓

5. A recipe for a cake calls for  $\frac{3}{4}$  cups of milk. If four cakes are going to be baked, how many cups of milk will be needed?

6. A five gallon bucket needs to be filled with water. If you only had a container that holds a pint, how many times would it take to fill up the bucket?

7. A total of 12 pies were made. If  $4\frac{2}{7}$  were eaten, how many pies are left?

8.

Nothing Junction  $12\frac{1}{4}$

If the total distance from the starting point to Nothing Junction is  $59\frac{1}{2}$  miles, how far has Misti already driven based on the road sign above?
